A medicament for the treatment of epileptics

This invention involves a kind of medical use and formulated products, especially insoluble medicine and formulated products.

There is no maiden break-through to the malade treatment of the epilepsy worldwide at present, have not developed the ideal medicament in some large hospitals in China either, only maintain it at administrating antiepileptic medicine, relieving muscular spasm at the level that medicine controls and breaks out, such as oral diphenylhydantoin sodium or luminal, but the form has minus effect, it can make the patient stare flankly, this amphi of medicaments can only give temporary relief but not can't get a permanent cure.

The purpose of this invention is to offer a medicament for the treatment of epileptics, can remedy the above-mentioned deficiency of the existing medicament.

Its characteristic of medicament of this invention is by diphenylhydantoin sodium, Carbamazepine, attack epilepsy aching, sodium valproate and mogadan tablet to make up. Their weight percent is 5-9, 15-19, 30-38, 30-38 separately and 5-9.

The medicament of this invention has peculiar curative effect to various typical epileptics and nervi trigeminus, innocis side effect, treat both principal and secondary aspect of disease.

Explain this invention through Examples as follows.

Attack 0.1g diphenylhydantoin sodium, 0.25g Carbamazepine, 0.5g epilepsy aching, 0.5g sodium valproate and 0.1g mogadan to make into tablet, each medicine apply bivalve, put together each, go on, sterilize under high pressure 15 minute. it is intact for tablet to keep. In the trigeminal site locate an acupuncture point, function as 2 acupoints each time, the acupuncture point is sterilized for 20-30 minutes in advance, the blade is within 1.5cm, buries the medicament enters, suture 1-2 stitch to get final product, once of mo.

Treat epileptics with the medicament of this invention, 8 people treated for 3 times and totally controlled the condition, basically control condition and 5 effective people, the response rate is 100%, the cure rate is 96%. Whom 5 treatment fully recover 8 people of the the above-mentioned patient, 8 cure have 3 people, 9 cure 2 people, its condition is controlled and cured.

Treat epileptics, mainly regulating meridian with it, relieve muscular spasm, spasmolytic effects tranquilizing, tranquilizing with the medicament of this invention, it is disorderly to inhibit the nervi trigeminus, inhibit brain epilepsy mega-disorder and neural spasmolytic of whole body, it can be used for various epileptics.
